

Every Morning

1. Plug in ScreenBeam power.
2. Turn on Laptop
3. Plug Laptop into Dock (if that's what you would normally do)
4. Connect to the ScreenBeam

Every Night

1. Disconnect from the ScreenBeam through the floating tab at the top.

2. Shut down Laptop. (Do not simply close the lid, power it off daily)
3. Unplug ScreenBeam power from Wall.

•*Tip for random issues*

- Unplug ScreenBeam power for 30 second, re-plug and connect.
- Restart your laptop, (especially if it has been turned on all night).
- If your laptop is going to be connected to the Dock most of the day, wait until it's plugged into the dock before connecting to the ScreenBeam.
- When you are finished with the ScreenBeam for the day, disconnect through the program before powering down your laptop.
